PROJECT & CAREER OBJECTIVE

I am a highly driven and continuous learner, deeply committed to executing assigned tasks with the utmost dedication. Beyond my versatile technical foundation in Full-Stack Web Development, Backend Architecture, Cloud Deployment, and Data Processing, I bring a cheerful, sociable, and lighthearted energy to the workplace—always appreciating a good joke to foster team collaboration. Currently completing a Bachelor of Information Technology, I am seeking an IT Intern / Fresher Software Engineer role where I can apply my logical problem-solving and engineering skills to deliver reliable, real-world solutions.

AVAILABILITY

Fully available for full-time roles. Expected graduation in 2028 with a minimal academic load (one course per semester), ensuring complete schedule flexibility during standard business hours.

EDUCATION

Bachelor of Information Technology | RMIT University & University of Technology Sydney (UTS) | Expected: 2028

- **AI & Algorithms:** Foundations of Artificial Intelligence, Algorithms and Analysis, Data Structures and Algorithms.
- **System & Security:** Secure Electronic Commerce, Cloud Foundations, Software Engineering Fundamentals.
- **Software Development:** Programming/Web Bootcamps, Application Development in iOS (Swift), Java Applications Programming.

TECHNICAL SKILLS

Programming Languages	JavaScript, SQL, Typescript, Python.
Fullstack & Web	Node.js, Express.js, Vue.js, React, NextJS, NestJS, Tailwind CSS, Bootstrap 5, Vite, HeroUI.
Data & AI	Pandas, Matplotlib, Data Modeling, Entity-Relationship Diagrams (ERD).
Databases	PostgreSQL (Neon Postgres), MySQL, MongoDB, Prisma ORM, Relational & NoSQL Schema Design.
Cloud & DevOps	AWS (EC2, S3, CloudFront, Lambda, DynamoDB, etc), Docker, Ansible, Git/GitHub, Linux.

PROJECTS

HPFood – Corporate & Food Supply Chain Portal | Frontend / Full-Stack Web Development | Repo - Live

Tech Stack: Next.js 16 (App Router), React 19, TypeScript, Tailwind CSS v4, Bootstrap 5, Neon Postgres, Brevo Email API

- Developed a responsive, high-performance corporate web platform for an industrial and school catering provider using Next.js 16 (App Router), React 19, and clean TypeScript architecture.
- Engineered a Supply Chain Transparency module enabling clients and school boards to inspect source provenance, testing certificates, and legal compliance per food category, alongside interactive UI components.
- Implemented backend Route Handlers integrated with the Brevo Transactional Email API to securely process inquiries in real time, while optimizing Core Web Vitals via YouTube iframe lazy-loading and next/image optimization.

Diet Deli – Food Ordering & Management System | Fullstack Web Development | Repo 1 - Repo 2 (old)

Tech Stack: React, TypeScript, Vite, TailwindCSS, HeroUI, NestJS, Prisma ORM, PostgreSQL, JWT, RESTful API

- Developed an end-to-end meal subscription and daily ordering system featuring customizable nutritional plans (400–800 kcal) and flexible delivery shifts (Lunch/Dinner).
- Engineered a dynamic calendar scheduling module (ISO-8601 standard), allowing customers to seamlessly book or swap meals across weekly menus while enforcing daily package limits (1-meal vs. 2-meal daily allowances).
- Implemented a strict Cutoff Time Validator (22:00 daily cutoff & weekend pre-order windows) to streamline kitchen prep schedules, resolving timezone discrepancies across client-server environments.
- Guaranteed high data consistency and atomic deductions of remaining meal credits using Prisma Database Transactions ($transaction) during booking and cancellation workflows.
- Decoupled subscription delivery metadata (shipping address, phone, special notes) from global user profiles to support flexible multi-location delivery requests.
- Enforced Role-Based Access Control (RBAC) via NestJS Guards, securing administrative endpoints for menu configuration and manual payment verifications.

RMIT Store | Fullstack & Cloud Deployment

Tech Stack: Django, Vue.js, Docker, AWS EC2, Git/GitHub, Jenkins, Ansible.

- Developed a scalable e-commerce application integrating a robust Django backend with a Vue.js interactive frontend.
- Containerized application components using Docker to ensure consistent development and production environments.
- Deployed the full-stack architecture on AWS EC2 and managed collaborative version control via Git/GitHub.

CERTIFICATIONS & SOFT SKILLS

Diploma of Leadership and Management | Melbourne Metro College (2024)

- *Focus:* Critical thinking development, team effectiveness management, and professional communication.

Certificate IV in Business | Rosehill College (2023)

- *Focus:* Analyzing research information, digital collaboration, and workplace health and safety.

Languages: English (PTE 6.3 / IELTS 6.0), Vietnamese (Native).
